

OUR EXTENDED PAYMENT PLANS MAKE IT EASY TO ACQUIRE THE VALUE ADDING SOLUTIONS YOUR COMPANY NEEDS TODAY!

Change Formation has partnered with a leading nationally chartered financial institution to make available direct lender financing of the solutions we provide. Inquire today to see how your company can qualify for the following benefits...

Take Up to 60 Months to Pay for Equipment, Software and Services

By removing the requirement to commit significant amounts of cash before implementation is even finished, Change Formation has torn down the principal barrier that stands between so many companies and the technology solutions they truly need to improve results. Qualifying customers can finance 100% of project hardware, software, annual fees and labor with affordable extended payment plans distributed across as many as 60 monthly payments.

We Are Authorized to Create Custom Payment Plans to Fit Your Needs

Our sales organization is empowered to craft the exact payment option your company needs to make it easy for you to acquire the technology solution you desire. Need a longer (or shorter) payment term? We can provide it. Want to defer payments for up to 3 months? We can authorize it. Desire to lower initial cash outlays to an absolute minimum? We can make it happen. In short, we are authorized to make it easy to start down the path to improved results today.

Our Extended Payment Options Routinely Beat Even the Best Bank Financing

Our unique financing plans pool the resources of our company, major technology partners and a nationally chartered financial institution to offer you not just a viable payment option, but the absolute best means to pay for the solutions we deliver. Companies that qualify for our extended payment plans often find that the no financial institution has the muscle or flexibility to match the options we provide.

Using Our Vendor Financing Options Is a Better Credit Management Decision

Companies that qualify for our extended payment plans are able to both avoid up-front cash outlays and – in most cases - lower their overall cost of capital. What's more, our vendor financing is simply a better way to manage credit as it does not limit borrowing power with your bank, require hard asset collateralization or lower your company's credit score like traditional loans and lines of credit do.

Payment Plans We Offer Can Qualify You for Immediate Tax Benefits

The capital leases we can provide unlock benefits that advanced depreciation under IRS Section 179 can enable. Under this program, most companies can write-off 100% of the cost of new technology systems in the year of acquisition (up to \$250,000!). The resulting tax credit can cover as many as 14 monthly payments, actually creating positive project cash flow until well after ROI sets in. Ask us for a complimentary analysis.
